

# Rice, Medium Grain

## MyPlate Food Group: Grains

### Nutrition Information

- Grains are divided into 2 subgroups: Whole grains and Refined Grains.
- Refined grains have been milled, a process that removes the bran and germ. This process also removes dietary fiber, iron, and many B vitamins. B vitamins (thiamin, riboflavin, niacin, folic acid) and iron are added back after processing. Fiber is not added back to enriched grains.
- Whole grains contain the entire grain kernel — the bran, germ, and endosperm. Examples of whole grains include whole-wheat flour, oatmeal, whole cornmeal, and brown rice.

### Uses & Tips

- Create a whole-grain pilaf by mixing barley, wild rice, brown rice, broth, and spices. For a special touch, stir in toasted nuts or chopped dried fruit.
- Use medium grain rice when stuffing baked green peppers or tomatoes.

### MyPlate Facts

- Grains are important sources of many nutrients, including dietary fiber, B vitamins (thiamin, riboflavin, niacin, and folate), and minerals (iron, magnesium, and selenium).
- Dietary fiber from whole grains or other foods may help reduce blood cholesterol levels and may lower the risk of heart disease, obesity, and type 2 diabetes.
- Fiber is important for proper bowel function. It helps reduce constipation and promotes regularity.

### Storing Foods at Home

- Store unopened packages of rice in a cool, clean, dry place.
- After opening rice, keep package tightly closed.
- Once prepared, store any leftover rice in the refrigerator in a sealed container not made from metal
